

Grant Strategy Package

One Process. Lasting Grant Success.

Are you a nonprofit that seeks grant funding? The Grant Strategy Package (GSP) is designed to increase your chances of getting a grant award. The GSP strengthens your case for investment, identifies your impact, and finds the grantmakers most aligned with your work. The 3-month strategy process results in the following deliverables:

-  **Grant Narrative**
We help you tell your story by creating a comprehensive, point-in-time narrative that includes everything funders want to see – history, mission, vision, community needs, programs, outcomes, and your plans to sustain the effort.
-  **Grant Budget**
Creating a budget that matches your narrative is critical for a competitive grant. Our process helps you align your financial story with your goals in a way that best supports your request.
-  **Grant Outcomes Road Map**
Your theory of change needs to match the story that you are telling about your organization. This road map includes an assessment of your current outcome measures framework and provides a logic model for use in grants.
-  **Grant Opportunity Report**
Based on comprehensive research on which funders align with your mission and priorities, this report identifies local, regional, and national grantors who may be interested in supporting your programs.

Is This Process For You?

Your organization lacks the resources to hire a dedicated grant writer.

Your staff and volunteers lack the necessary grant experience to develop a strategy.

Your organization needs to increase its grant revenue.

It's time to refresh how you talk about your organization through your grants.

The Grant Strategy Package is an affordable solution to increase your grant success!
