

What will make your organization stronger?

Organizational Sustainability Assessment

The Organizational Sustainability Assessment is an online tool and analytical process based on key principles of sustainability for nonprofit organizations.

The Assessment guides nonprofit organizations through a self-assessment of organizational capacity, challenges, and strengths. Designed to gather input from stakeholders internal to the organization, the tool focuses on nine core business areas that are critical pillars for sustainability in the social sector.

Assessment and Survey Administration

Using our targeted tool, we administer a survey to organizational stakeholders such as the executive team, board, and staff at all levels. The assessment explores nine critical business areas through a series of rating scales, as well as short-answer and open-ended questions.

Analysis and Findings Report

We analyze and interpret the response data and prepare a detailed report and one-page overview. We deliver a quantitative and qualitative breakdown of your organization's strongest assets and areas of vulnerability.

Pointing the Way Forward

We help you translate the results into actionable next steps. Through guidance from our expert team, we work with you to identify opportunities to fortify your organization's vulnerable areas and leverage its strengths.

Nine Core Business Areas

- Mission/Vision/Planning
- Infrastructure
- Human Resources
- Leadership – Board
- Leadership – Executive
- Resource Development
- Financial Management
- Program Evaluation
- Collaboration

The information you need to have the right conversations.
